

## Section 1 - The rationale for physical activity and mental health

<b>1. Introduction: why physical activity and mental health</b> .....	<b>3</b>
1.1 A brief history .....	4
1.2 The organization of this book .....	5
<b>2. Epidemiology and diagnostic criteria of psychiatric disorders</b> .....	<b>7</b>
2.1 Schizophrenia and other psychotic disorders .....	8
2.2 Mood disorders .....	11
2.3 Anxiety disorders .....	12
2.4 Eating disorders .....	14
TEXTBOX 2.1 Schizophrenia: DSM-IV Diagnostic Criteria .....	9
TEXTBOX 2.2 Definitions of Mood Episodes according to DSM-IV .....	10
TEXTBOX 2.3 DSM-IV Diagnostic Criteria for Obsessive-Compulsive Disorder .....	12
TEXTBOX 2.4 DSM-IV Diagnostic Criteria for Panic Disorder .....	13
TEXTBOX 2.5 DSM-IV and DSM-5 Diagnostic Criteria for Generalized Anxiety Disorder .....	14
TEXTBOX 2.6 DSM-IV and DSM-5 Diagnostic Criteria for Posttraumatic Stress Disorder .....	15
TEXTBOX 2.7 DSM-IV and DSM-5 Diagnostic Criteria for Anorexia Nervosa .....	17
TEXTBOX 2.8 DSM-IV Diagnostic Criteria for Bulimia Nervosa .....	18
<b>3. Physical activity and mental health,     psychological and physiological mechanisms</b> .....	<b>19</b>
3.1 Mental health and physical activity .....	19
3.2 Psychological and physiological mechanisms .....	27
3.3 Physical activity: handle with care .....	33
3.4 Summary: clinical implications of physical activity and indication for exercise setting .....	37
TEXTBOX 3.1 Principles to create an effective setting for physical activity .....	37
TEXTBOX 3.2 Exercise and mental health: clinically relevant points .....	38
<b>4. Psychopharmacological drugs and physical activity</b> .....	<b>39</b>
4.1 Introduction .....	39
4.2 Adverse drug reactions .....	39
4.3 Main adverse reactions due to psychotropic drugs .....	40
4.4 Medication-induced movement disorders .....	41
4.5 Medications and weight gain .....	43
4.6 Endocrine system and psychotropic agents .....	44
4.7 Conclusions .....	45
TEXTBOX 4.1 Abnormal eating behaviors .....	44

## **Section 2 - Physical activity and exercise in the approach of mental health problems**

<b>5. The role of exercise in the generation and regulation of stress</b> .....	<b>49</b>
5.1 Introduction .....	49
5.2 How does stress affect health? .....	51
5.3 Exercise and the perception of stress .....	52
5.4 Summary and practical recommendations .....	56
<b>6. The role of exercise in alcohol dependence recovery</b> .....	<b>59</b>
6.1 What alcohol is .....	59
6.2 Maladaptive pattern of alcohol use .....	59
6.3 The dimensions of the problem .....	60
6.4 Alcohol consumption and sport participation .....	60
6.5 The effects of alcohol on physical performance .....	61
6.6 Exercise interventions in alcohol dependence treatment .....	61
6.7 Potential mechanisms of action .....	64
6.8 Suggestions to organize a group-based exercise program in a clinical setting .....	66
6.9 Conclusion .....	67
<b>7. Physical activity in the treatment of people with schizophrenia</b> .....	<b>69</b>
7.1 Characteristics of schizophrenia .....	69
7.2 Rationale for physical activity in schizophrenia .....	69
7.3 Practical implications for physical activity interventions in schizophrenia .....	72
7.4 Summary and guidelines for physical activity interventions in schizophrenia .....	74
TEXTBOX 7.1 Practical suggestions for physical therapists .....	73
<b>8. Life in movement: a physical activity program involving schizophrenic participants in community settings</b> .....	<b>75</b>
8.1 Introduction .....	75
8.2 Schizophrenia and physical activity: the life in Movement program experience .....	76
8.3 The rationale .....	77
8.4 LMP – the Pedagogical platform .....	78
8.5 The Life in Movement interventions platform .....	80
8.6 Assessment and evaluation experiences .....	88
<b>9. Exercise for depression and anxiety: an evidence based approach and recommendations for clinical practice</b> .....	<b>91</b>
9.1 Depression .....	91
9.2 Anxiety .....	94
9.3 Potential mechanisms of action .....	95
9.4 Depression, anxiety disorders, and physical health .....	97
9.5 Depression, anxiety disorders, and cognitive functioning .....	97
9.6 Evidence based recommendations for clinical practice .....	98
9.7 Strategies for improving motivation and adherence to exercise .....	99
TEXTBOX 9.1 The American Psychiatric Association criteria for diagnosis of Major Depressive Disorder .....	91
TEXTBOX 9.2 Assessment of physical fitness and the perceived exertion during exercise .....	98

TEXTBOX 9.3 Risk stratification for patients with comorbid somatic disease .....	99
TEXTBOX 9.4 Inventorying perceived barriers and benefits of exercise participation.....	99
<b>10. Eating disorders and physical activity: a complex relationship .....</b>	<b>101</b>
10.1 Physical activity in patients with eating disorders .....	102
10.2 A conceptual proposal .....	106
10.3 A Flemish clinical concept for physical activity as an inpatient treatment approach .....	109
TEXTBOX 10.1 Excessive exercise.....	104
TEXTBOX 10.2 Osteoporosis in eating disorders .....	106
TEXTBOX 10.3 A case of a girl with anorectic behavior .....	108
TEXTBOX 10.4 What can you do if a person is exercising beyond what is considered safe for his/her health?.....	112
<b>11. Eating disorders in athletes .....</b>	<b>115</b>
11.1 Eating disorders specific to athletes .....	115
11.2 Prevalence and aetiology .....	116
11.3 Physical activity/sport: a social risk factor .....	117
11.4 Prevention and treatment of ED in athletes.....	118
TEXTBOX 11.1 Guidelines for appropriate weight loss in sport leanness based on the recommendations of Rhea et al. (1996).....	121
<b>12. Obesity and exercise in psychiatric patients.....</b>	<b>123</b>
12.1 What overweight and obesity are .....	123
12.2 The aetiology of overweight and obesity .....	123
12.3 Consequences of overweight and obesity .....	124
12.4 The treatment of obesity.....	125
12.5 The realization of physical activity on obesity.....	127
12.6 Conclusions .....	134
TEXTBOX 12.1 Methodological principles in the treatment of obesity .....	130
TEXTBOX 12.2 Barriers to physically active for obese people .....	133
<b>13. The role of physical activity in the treatment of attention deficit hyperactivity disorder .....</b>	<b>135</b>
13.1 Introduction.....	135
13.2 Physical activity and ADHD: theoretical overview .....	137
13.3 Treatments .....	138
13.4 Suggestions for physical activity intervention .....	140
13.5 Summary.....	141
TEXTBOX 13.1 The five stages of FSS to enhance the learning of self-paced motor skills.....	141
<b>14. Sport and adolescents with severe conduct disorders .....</b>	<b>145</b>
14.1 Introduction.....	145
14.2 Sport and severe conduct disorders: theoretical overview.....	146
14.3 Recommendations.....	148
TEXTBOX 14.1 Conduct disorders: summary/guidelines.....	150

<b>15. Physical activity and people with intellectual disability (mental retardation) .....</b>	<b>151</b>
15.1 Intellectual disability.....	151
15.2 Rationale for physical activity in intellectual disability.....	152
15.3 Practical implications for PA-interventions in people with intellectual disability.....	153
TEXTBOX 15.1 Physical activity-interventions in people with intellectual disability: summary/guidelines .....	156
 <b>16. Physical activity – psychomotor therapy and elderly with psychiatric disorders .....</b>	 <b>157</b>
16.1 Brief description of the characteristics of the disorder.....	157
16.2 Theoretical scientific view why PA may be important for this disorder .....	158
16.3 Translating theory into practical applications.....	163
16.4 Summary and guidelines .....	167
 <b>Section 3 - Instruments</b>	
<b>17. Assessment and evaluation instruments of physical activity to use in people with mental health problems .....</b>	<b>171</b>
 <b>18. Sport activities in leisure time for people with psychiatric disorders.....</b>	<b>179</b>
18.1 Introduction.....	179
18.2 Background: sport and disability .....	179
18.3 Sport Federations in Europe for people with a mental disability .....	180
18.4 International sport organizations for people with a disability.....	182
 <b>References .....</b>	<b>185</b>
<b>Subjects index .....</b>	<b>213</b>
